SUBJECT INDEX

Defense response, 123
  and parasympathetic activity, 124
  and sympathetic activity, 123
  mediation of, 123
Event-related potentials, 163, 173, 181, 199, 227, 239
  and a vasopressin analog (DGAVP), 227
  and orienting, 199
  and principal components analysis, 163, 173, 181
  and stimulus mismatch, 227
  from single trials, 199
  lateralization of, 239
Hypertension, 135
  and cardiovascular activity, 135
  and family history, 135
  and life events, 135
  and psychological stress, 135
Immunomodulation, 25
  and classical conditioning, 25
  and conditioned immunoenhancement, 32
  and conditioned taste aversion, 26
  and immunosuppression, 34
Memory, 67
  and Alzheimer's disease, 68
  and septo-hippocampal grafts, 67, 70, 77
  restoration of, 67, 83
Metabolism, 3
  and diabetes, 3,
  and obesity, 3
  CNS regulation of, 12
  hypothalamic regulation of, 11
Nicotine, 251
  in heavy and light smokers, 251
  regulation of, 251
Obesity, 3, 12
Orienting, 105, 265, 271
  and electrodermal activity, 105, 265, 271
  and processing resources, 105
  and stimulus miscuing, 108, 113
  and stimulus omission, 117, 118, 265, 271
Pain, 41, 52
  and naloxone, 52
Pavlovian conditioning, 41, 89, 149
  and cognition, 89, 149, 157
  and compensatory CRs, 46
  and conditioned inhibition, 89
  and immunomodulation, 25
  and propositional knowledge, 149
  and response processes, 157
  and safety signal learning, 89
  and stimulus associability, 105
  and tolerance, 42, 44
  in the regulation of pain, 41, 52
  with fear-relevant stimuli, 89
  with morphine, 41
  with naloxone, 41, 49, 55
  two-process view of, 153
Processing resources, 105
  allocation of, 105
  and classical conditioning, 106, 107
  and habituation, 105
  and orienting, 105
  and stimulus miscuing, 108, 113
  and stimulus omission, 117, 118
Stress, 135
  and cardiovascular activity, 135
  and hypertension, 135
